

Checklist for Burning on Urination

The student asks the following questions:

- When did you begin to feel burning on urination?
- Do you have nausea and vomiting, abdominal pain, back pain, fever, chills, or diarrhea?
- Do you have vaginal or urethral discharge?
- Do you have blood in your urine, constipation, or diarrhea?
- Do you feel burning with urination or burning when urine passes over the labia (may indicate herpes simplex infection)?
- Do you have a history of diabetes, immunosuppression, or (if a male) prostatic hyperplasia?
- What type of contraception do you use? Do you use it 100% of the time?
- (If a female) When was your last normal menstrual period?
- Any history of UTIs or kidney infections?
- What treatments did you receive for your UTI and were they effective?
