

Checklist for Blurred Vision

The student asks the following questions:

- Is one eye affected, or both eyes?
- When did the blurred vision first occur and is it intermittent or constant?
- Do you have any pain, visual loss, or headaches?
- Did the pain and visual loss (central or peripheral) occur suddenly or gradually?
- Do you have light sensitivity (photophobia)?
- Do you have a family history of glaucoma or eye disorders?
- What medications are you on

Note: (check for anticholinergic medications or steroids)?
